PROFESSIONAL SUMMARY

Flutter Developer and Mobile Software Engineer with 5+ years in software development, including 3+ years in Flutter and 2+ years delivering commercial mobile products. Builds local-first and API/server-backed applications, owns architecture through release, and uses AI-assisted workflows while retaining code review, QA, and responsibility for the final result.

EXPERIENCE

Flutter Developer — Confidential Mobile App Publisher (Remote) | June 2024 — Present

- Delivered and maintained a portfolio of 120+ fully functional Flutter applications across local-first utilities, content products, social experiences, games, and API/server-backed mobile flows.
- Owned architecture, state management, navigation, data models, persistence, responsive UI, localization, QA, and release preparation across Android and iOS builds.
- Integrated REST APIs and server-backed functionality while also delivering offline products with durable local storage.
- Designed an AI-assisted delivery pipeline using reusable Flutter architectures and generated visual assets, reducing estimated cost per market-ready variant by up to 10x while retaining engineering review and release responsibility.

Independent Flutter Developer — Personal Product Development | June 2023 — June 2024

- Built complete Flutter products using routing, state management, reusable widgets, data models, local persistence, and responsive layouts, establishing the foundations later applied in commercial delivery.

Independent Software Developer — Web and Application Projects | June 2021 — June 2023

- Built web and application projects with C# and React, working with UI state, data flow, APIs, and server-backed functionality before specializing in Flutter.

SELECTED PROJECTS

HingeBench — Offline-first cabinet hardware planning utility with deterministic geometry, persisted hardware profiles, job snapshots, safety warnings, GetX state management, unit tests, and GitHub Actions. [Source](#)

Dugout Delta — Local-first baseball and softball practice application using BLoC/Cubit, immutable feature state, repository-backed persistence, draft recovery, and derived readiness and practice-queue workflows. [Source](#)

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, responsive UI, localization, animations

Architecture and State: GetX, BLoC/Cubit, repository pattern, dependency composition, local-first architecture

Data and Integration: REST APIs, Dio/http, JSON models, WebSocket flows, server integration, local persistence

Quality and Tooling: Unit testing, Flutter analysis, Git, GitHub Actions, Xcode, Android Studio, AI-assisted development

Additional: C#, JavaScript, React

EDUCATION

Secondary Vocational Diploma, Technician-Programmer — South Ural State Technical College
